

Congratulations on taking this important step towards a Full Patent Protection for your invention. The Client services department would like to introduce ourselves as we will be servicing your patent moving forward. We have received your file from your Patent Services representative you were working with in the early stages of your project. The information received has been forwarded to an Independent Registered Patent Attorney within our network to begin the draft of your patent Application. The drafting process is a very important step to ensure your application is prepared coinciding with your initial submission, this process takes approximately 8 – 10 weeks. Once the draft is completed we will forward it to you along with forms that require your signature, but most importantly we need you to review your application and approve it. Your application will not be submitted to the United States Patent and Trademark office without your approval first. If you require changes to your application this information must be submitted in writing to ensure accuracy.

Once you submit approval of your Patent application it will be filed with the United States Patent and Trademark office and your application will become patent pending. Once you are issued a patent pending number, we will introduce you to the International Licensing Consultants. The ILC is an affiliated company that handles the marketing of your product. They will look for manufacturers, go to trade shows on your behalf and manage your marketing project.

You will receive automatic updates on the progress of your drafted application from the client services department at Patent Services USA on a monthly basis. We will also keep all of your information confidential therefore the Patent Services representative you worked with previously will not have access to your file. Typically, we communicate via email and via your inventor's portal at ownmyinvention.com to keep track of all updates. A live client services representative is available to speak with you at your convenience Monday – Friday from 8am – 5pm eastern time excluding holidays.

We are excited to be a part of your team. Our mission is to provide you, the inventor with a world class patent service experience.
