SIGN CONTRACT

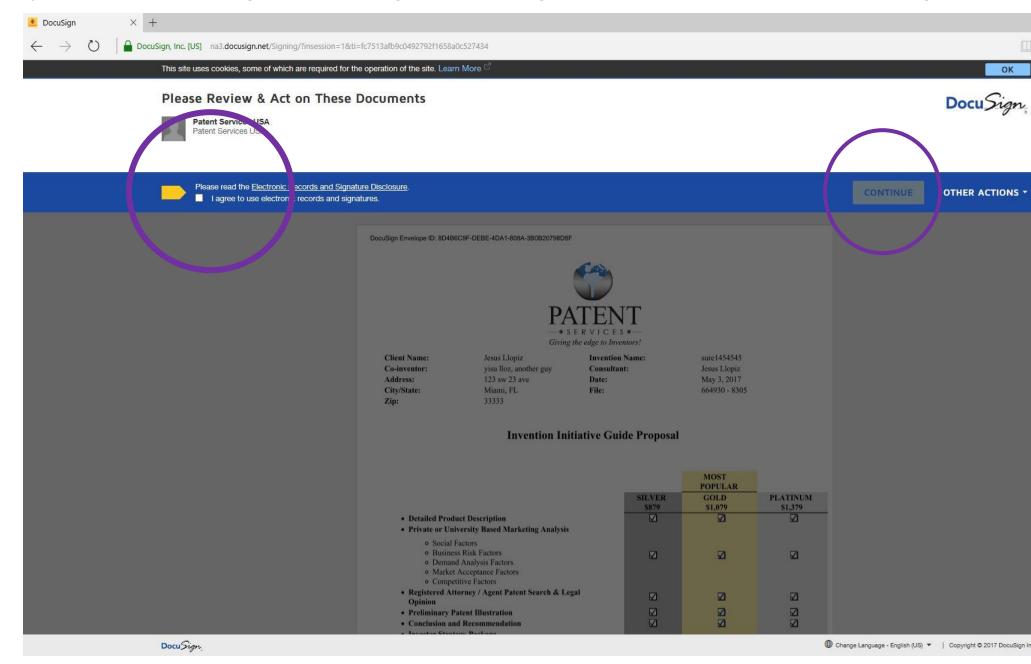

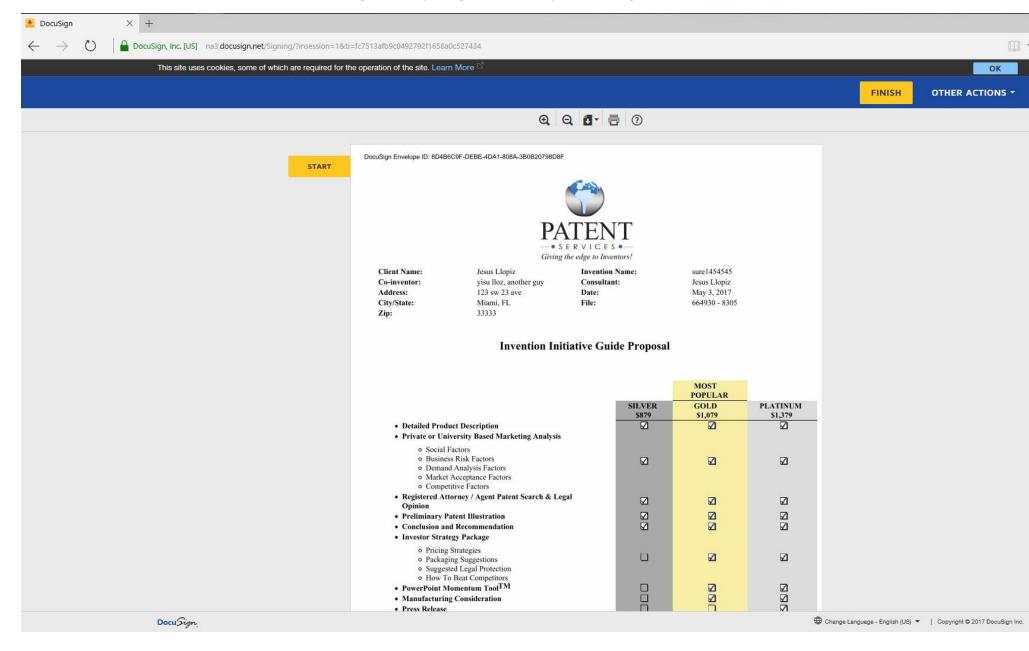

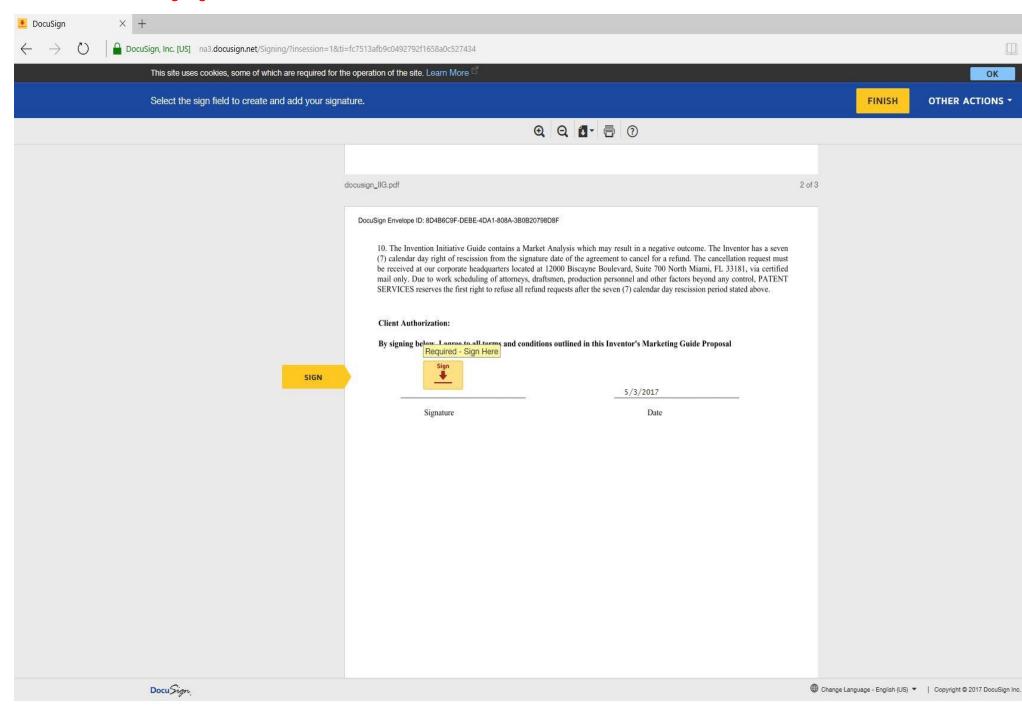

### System will redirect the CT to DocuSign. The client needs to agree to use electronic signature (click the left checkbox and then click continue in the right side)

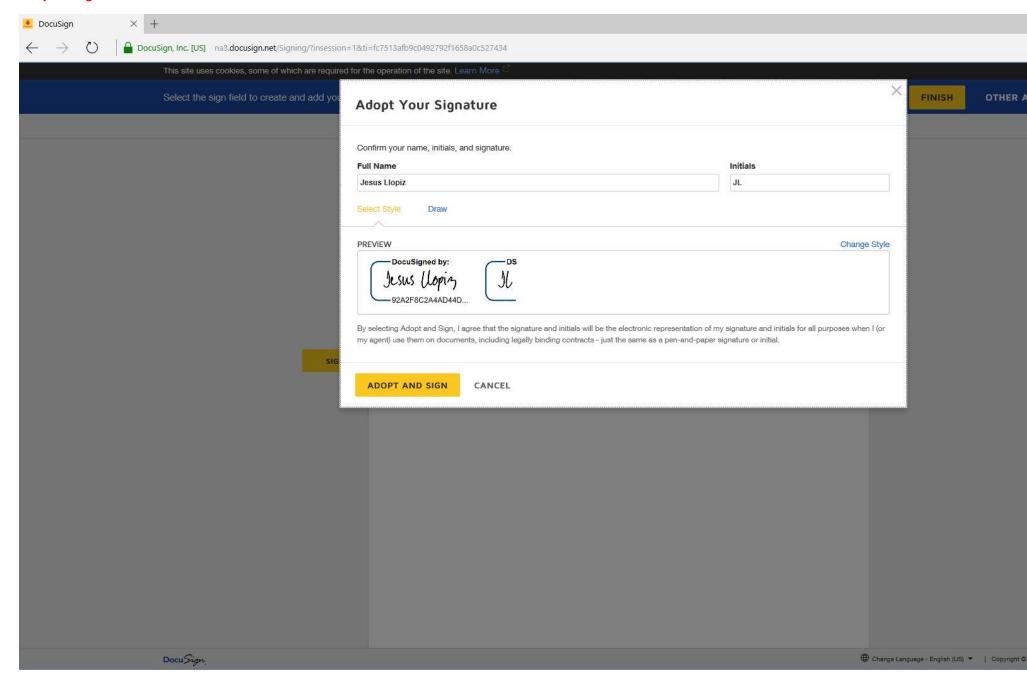

The client can read the contract but he can't make changes to the package selected, he just has to sign at the end of the contract.

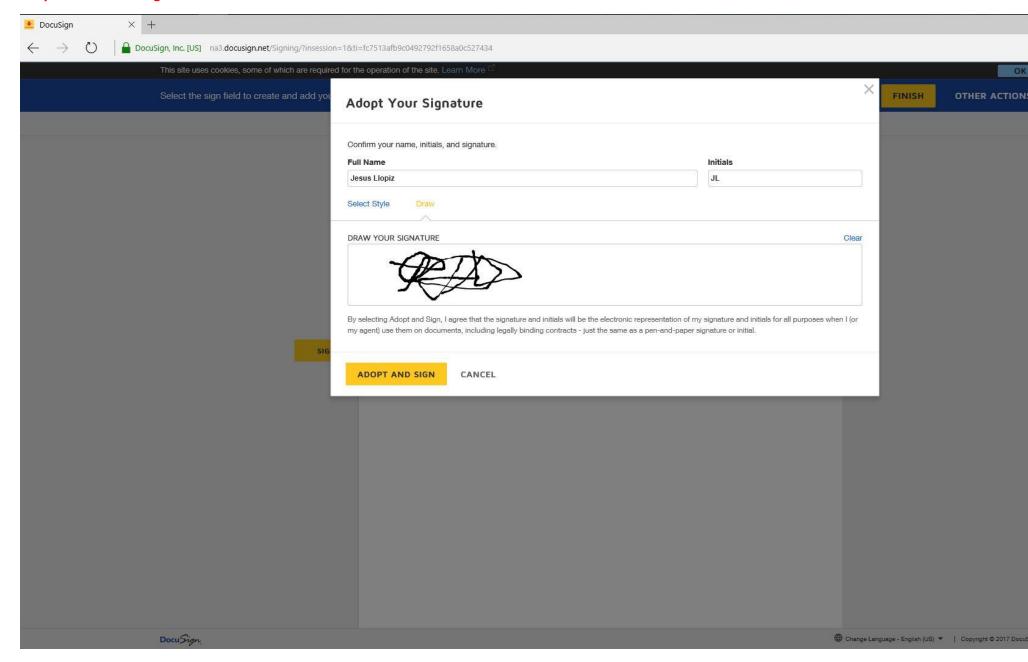

### Client has to click in the Sign signal

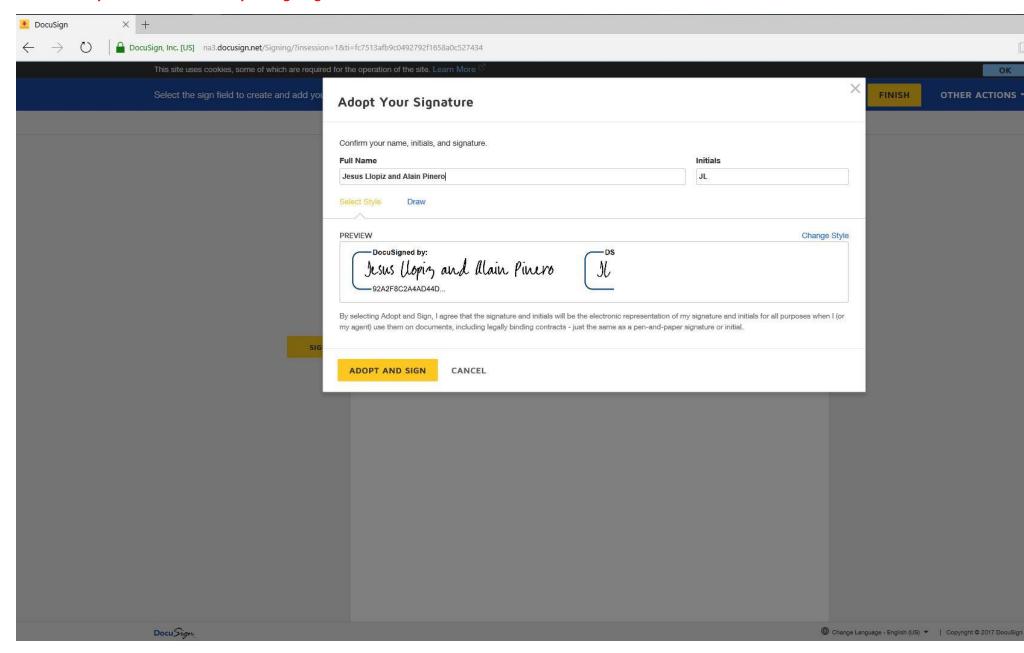

## They can sign with their names:

## They can draw their signatures:

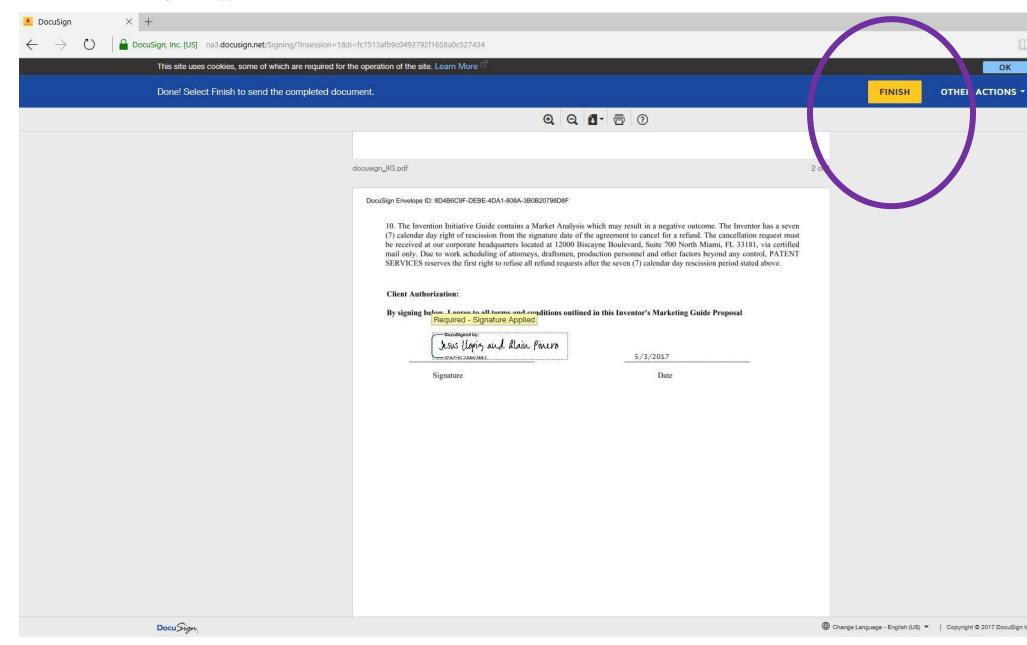

## If they have co-inventors they can sign together:

### After they select the signature they have to click "Adopt and Sign"

# After the document is signed they just have to click "FINISH"

After the client click in the "FINISH" button the system will redirect him to the payment platform to proceed with the payment as always:
